

## Save the "Iron Woman"

Known as the "Iron Woman" because she steamed 250,000 miles without putting into port, *Cabot*

(CVL 28) also survived two kamikaze attacks in the Pacific during WW II. Today, she is the only remaining unmodified straight-deck aircraft carrier from

the war. The American Academy of Industry is attempting to save *Cabot* from being scrapped. Anyone who wants to join the effort to preserve her may contact Bill Hayden at the academy, PO Box 293, Chicago Ridge, IL 60415, 773-928-2841.

## Naval Aviation Online

<http://skyraider.org> The A-1 Skyraider Association "Member Contributions" section includes photos and information on the *Skyraider*. The "A-1 Combat Journal" section is a virtual book in progress recounting *Skyraider* combat missions. Other sections include ordnance descriptions and video clips of the A-1.
